Attached to this email is a list of
Money Management Webinars

Greetings Spartans,

The life of a college student is always full of activities. It can be hard to balance school and social life. That is why it is imperative that you get your priorities right while working to succeed in college. It is not only the academics that matter. In many instances, you can learn more outside the confines of a classroom. There are campus events that will involve things that you're passionate about while others you will come to know for the first time. This broadens your perspective of things and life in general. You get to learn how to handle issues which you might have found challenging if you were to encounter them for the first time. US@MSU has provided a list of a few events we encourage students to attend to expand your knowledge and skills!

Who We Are:

US@MSU is an information network system, to inform underrepresented, first generation, and/or low-income students at Michigan State University.

US@MSU was constructed out of the Office of College Access Initiatives (CAI); which provides academic enrichment programs to high school students in Lansing and surrounding areas in order to increase the number of youth, from disadvantaged backgrounds who complete high school and enroll in post-secondary education.

Programs also serve individuals who have dropped out of high school, to age 27, by encouraging them to re-enter the educational system and complete their education.
